

C O N T E N T S

A. Andrearczyk and G. Żywica: A concept of a test stand for the investigation of a 3D printed turbochargers and selected fluid-flow machinery	3
M. Banaszekiewicz and K. Dominiczak: A methodology for online rotor stress monitoring using equivalent Green's function and steam temperature model	13
Ł. Breńkacz and G. Żywica: An experimental investigation conducted in order to determine bearing dynamic coefficients of two hydrodynamic bearings using impulse responses	13
D. Garcia and G. Liśkiewicz: Stable or not stable? Recognizing surge based on the pressure signal	55
F. Grapow and G. Liśkiewicz: Compressor modeling using Greitzer model validated by pressure oscillations	69
A. Jaeschke and G. Liśkiewicz: Mathematical surge modeling based on the pressure oscillations in the stable operation range of the compressor	91
M. Lackowski and H. Nowakowska: Electric field influence on a height of rise of a dielectric liquid between two parallel electrodes	109
J. Łagodziński and P. Zieliński: A combined numerical-experimental model of air foil bearing compliant structure	117
T. Pałczyński: Resonant characteristics of flow pulsation in pipes due to swept sine constraint	131
R. Rusanov, Ł. Jędrzejewski, P. Klonowicz, G. Żywica, P. Lampart and A. Rusanov: Design and performance study of a small-scale waste heat recovery turbine	145
